

**EMShield Wallpaper**

## EMSHIELD WALLPAPER

### CONDUCTIVE WALLPAPER FOR ELECTROMAGNETIC SHIELDING

EMShield wallpapers are utilized to shield sensitive electronics, wireless networks, and secure communications from hacking, snooping, and spectrum congestion. EMShield provides a wide range of broadband shielding for the aerospace, medical, electronics, entertainment, and recording industries. Our wallpapers are quickly applied using standard installation methods, and can be covered with paint or other wall coverings.

- Reduced electromagnetic signal emanation
- Reduced signals to personnel
- Easy installation using standard methods
- Meets ICD-705 RF requirements
- Less installation time & cost compared to metal or foil
- Reduced weight compared to metals or foil
- Corrosion resistant
- Repairable
